

pride in creativity

Town Centre Manager

c £40k (package negotiable) plus relocation
package up to £4,600

Ref: RS405

With your creativity, confidence and commercial acumen, you'll certainly have the ability to make a significant contribution to improving the competitiveness of Walsall Town Centre as it undergoes an exciting and radical transformation.

As part of our innovative approach to partnerships, we are working closely with Walsall Regeneration Company, private investors and other key business partners to redevelop and regenerate the town centre.

Exciting things are already happening, and what we seek now is to attract a talented individual with the flair, drive and ambition to really add value through the development of a new, model Town Centre Management approach.

With ideally a commercial background, we are looking for someone who can develop creative approaches to secure income and investment to support a programme of activities that aim to improve the overall trading environment and the visitor experience.

Strong influencing, marketing and/or promotional skills are important but perhaps more important is the ability to inspire and facilitate collaborations between diverse public and private sector organisations. You'll also need a proven ability to manage staff, resources and performance.

What we can offer is the support of the full range of partners to really make a difference. In addition we can offer an attractive package including flexible working, generous annual leave, a final salary pension scheme, personal and professional development opportunities, and reduced-cost parking arrangements.
